Re: Miller Salvage Leachate Volumes

Dear Melissa:

The purpose of this letter is to summarize the actions taken by Mill's Pride to address leachate volumes at the Miller Salvage Site as an emergency response measure. Mill's Pride responded to high levels of leachate in the current collection pond on May 27, 2004. Plans were made to execute steps to remove leachate from the site to maintain capacity in the pond pending future rains. Trucks were scheduled at the site the morning of May 28, 2004. The night of May 27, 2004, the Miller Salvage Site received in excess of 3" of rainfall in less than 12 hours. The morning of May 28, 2004 the pond was overflowing into the lower meadow as a result of the preceding rains.

The plan executed by Mill's Pride involved the transporting the leachate to several approved outlets. Each of these sites received analytical data on the leachate prior to shipment. Pre-approval was obtained on each of these sites. The data was based on test results obtained on March 23, 2004. The following sites are approved outlets for the leachate collected at the Miller Salvage site.

Company Name	Primary Contact	Location	Phone	Treatment Method	Price \$/Gallon
Pinegrove Landfill (Republic Services, Inc.)	Tony Furgiuele	Amanda, OH	740-969-4487	Solidification	\$.13 + Dust for Solidification
United Wastewater	Todd Atkinson	Cincinnati, OH	513-733-4666	Treat and release to POTW	\$.10

Company Name	Primary Contact	Location	Phone	Treatment Method	Price \$/Gallon
Mead Westvaco	Randy Keefer	Chillicothe, OH	740-772-0180	Treatment Plant	\$.10
Clean Water Limited	Adam Albright	Columbus, OH	614-895-5201	Treatment Plant	\$.21 Includes transportation

In order to ensure capacity was maintained during the emergency response period, a minimum number loads were required each day. This number varied based on the flow rate into the pond. The flow rate for this period ranged from 3,000 to 7,000 gallons/hour. The following companies were approved to transport the leachate to the approved locations.

Company Name	Primary Contact	Location	Phone	Deliver Locations	Price \$/Load
W. D. Farms Inc.	Eric Dressbach Average 5,700 gal./load	Circleville, OH	740-474-1618	Pinegrove Mead United	\$350 \$250 \$420
United Wastewater (Sub-contract Louiso)	Todd Atkinson Average 6,500 gal./load	Cincinnati, OH	513-733-4666	United	\$480
Clean Water Limited	Adam Albright	Columbus, OH	614-895-5201	Treatment Plant	\$.21/gallon Includes transportation

This emergency action began on May 28, 2004 and will continue through June 11, 2004. During this period Mill's Pride will remove an average of 85,000 gallons/day. The average total cost for removal (treatment + transportation) to date is \$15,555/day. The total amount of water removed during this period will be approximately 1,053,000 gallons at a cost of over \$200,000. The above activity was taken voluntarily in the nature of an emergency action and in response to the concerns you raised in our meeting of May 27th regarding the condition of the pond. We believe the above procedures to address leachate are now at a point where Miller Salvage can, and should, assume responsibility for continuing leachate activities.
